

Rejawanul Haque

Dhaka, Bangladesh | rejhaqtonmoy@gmail.com | Open to Remote Data Annotator Roles | [LinkedIn](#) | (Flexible with US Time Zones)

Professional Summary

Detail-oriented Data Annotator and ML Researcher with 5+ years of experience in high-quality data labeling for computer vision and machine learning projects. Expertise in **bounding boxes**, **polygon annotation**, **semantic segmentation**, **keypoints**, video frame-by-frame labeling, human tracking, and teeth annotation. Delivered accurate annotations across 100+ projects with consistent accuracy while strictly following complex guidelines. Seeking remote data annotator positions with US-based AI and tech companies.

Skills

Annotation Techniques: Bounding Boxes, Polygon Annotation, Semantic Segmentation, Keypoints, Human/Object Tracking, Video Frame-by-Frame Labeling, Hand Movement Annotation, Teeth/Dental Annotation

Computer Vision & ML: Image & Video Annotation, Object Detection, Action Recognition, Dataset Creation for Model Training, Quality Assurance

Tools: CVAT, Labelbox, and other standard computer vision annotation platforms

Soft Skills: High Attention to Detail, Strict Guideline Adherence, Time Management, Remote Collaboration, Analytical Thinking.

Languages: English (Conversational)

Professional Experience

Data Annotator (Part-time) | Quantigo AI, Dhaka (Remote) | Feb. 2019 – June, 2024

- Completed over **100 projects** involving **polygon annotation**, **semantic segmentation**, and **keypoint labeling** for computer vision datasets, maintaining a higher **accuracy consistently with minimal revision**.
- Created precise **bounding box annotations** on restaurant kitchen videos for **human tracking** and activity recognition to support real-world ML model training.
- Performed detailed **teeth annotation** on dental/medical images, contributing high-quality labeled data for healthcare AI applications.
- Ensured consistent data quality and guideline adherence across large-scale image and video datasets.
- Collaborated remotely with ML teams to refine annotation processes and improve dataset quality for model performance.

Data Annotator (Part-time) | Linewise (Remote) | August, 2024 – Present

- Conducted frame-by-frame video annotation focusing on detailed **hand movements** and fine-grained actions for action recognition models.
- Generated accurate ground truth labels on video datasets, supporting reliable training data for machine learning pipelines.
- Demonstrated strong attention to detail while handling repetitive, high-volume annotation tasks under project deadlines.

ML Researcher | Independent research | 2024 – Present

- Conducted computer vision research involving image and video data processing, annotation support, object detection, tracking, and dataset preparation for ML models.
- Applied practical knowledge of vision-related tasks to enhance data labeling quality and model evaluation.
- Gained hands-on experience in preparing training datasets that improve AI model accuracy in real-world scenarios.

Education

Bachelor of Computer Science (2023) | National University, Bangladesh
